EDSE 3210 Int Tching through Arts & PE
This course examines the theories and practices of arts integration, multicultural education, art and culture in community, and arts disciplines, including music, visual art, poetry, storytelling, drama, and physical movement. Candidates will learn effective teaching strategies to address the needs of all diverse learners through integrating arts and PE into the curriculum areas of mathematics, social studies, science and language arts and reading.
Prerequisites: Admitted to and in good standing in the College of Education or department approval.

EDSE 3305 Intro to Special Education
This course provides an introduction to the field of special education including current knowledge on individuals with all types of exceptionalities. Emphasis is placed on historical factors, legislation, litigation, advocacy, etiology, characteristics, needs, educational strategies, including existing and emerging technologies, assessment, and support services of/for individuals with disabilities. Course addresses the collaborative roles of parents and schools within a multidisciplinary approach to supporting individuals with disabilities in a diverse society.

EDSE 3310 High Incidence Disabilities
This course focuses on the characteristics and academic, social and behavioral needs of students with mild OR high incidence disabilities. Emphasis is placed on evidence-based methods for designing, adapting and delivering instruction to students with high incidence disabilities in a variety of settings.

EDSE 3315 Low Incidence Disabilities
This course focuses on the characteristics and academic, social and behavioral needs of students with low incidence disabilities. Emphasis is placed on evidence-based methods for designing, adapting and delivering instruction to students with low incidence disabilities in a variety of settings.

EDSE 3320 Measurement&Eval for Spe Ed
This course focuses on assessment principles and non-discriminatory evaluation procedures used in special education including, statistical concepts, formal and informal measures, and testing instruments used in assessing academics, behavior, intelligence and adaptive behavior. Includes the interpretation of assessment results for educational interventions.
Prerequisites: Admitted to and in good standing in the College of Education or department approval.

EDSE 3324 Inclusive Practices Young Chil
A survey of information regarding children with special needs including possible causes and characteristics of exceptionalities, inclusive practices, intervention strategies, available resources, and the advocacy role. Emphasis will be placed on working with families and specialists.

EDSE 3325 Management of Special Ed Class
Investigates classroom and behavior management strategies pertaining to special education classrooms. Includes legal implications involving applied behavior analysis and other management issues. A grade point average of 2.75 is required to enroll in this course.
Prerequisites: Admission to the College of Education.

EDSE 4199 Issues in Special Education
This course examines current topics in the field of special education. May be repeated once when topic changes. To be taken as a capstone course by Special Education majors.
Prerequisites: Admission to the College of Education.

EDSE 4299 Issues in Special Education
This course examines current topics in the field of special education. May be repeated once when topic changes. To be taken as a capstone course by Special Education majors.
Prerequisites: Admission to the College of Education.

EDSE 4315 Adapting the Curr for Spec Ed
This course examines the various approaches to teaching and adapting mathematics, science, language arts, and social studies to children with special needs. Special attention will be given to writing behavioral objectives and IEPs based on TEKS. Admission to the College of Education, 2.75 overall grade point average required to enroll in this course.
Prerequisites: EDSE 3310 and EDSE 3315 (may be taken concurrently), or permission of advisor.

EDSE 4330 Special Ed Law&Procedures
Examine the basic principles of IDEA and special education laws with emphasis on IEP requirements; legal and educational terminology and definitions for students with exceptionalities; cases and trends in special education law with case analyses; exploration of the historical, philosophical, and ethical perspectives of diversity and its impact on the educational services for students with special needs.
Prerequisites: Admitted to and in good standing in the College of Education or department approval.

EDSE 4350 Inc Pract Ch&Yth W/Disablts
This course focuses on the characteristics of children and youth with disabilities. Emphasis is on federal and state legislation, case law, consultative teaching, inclusive practices, and assessment to determine effective interventions, and differentiation of instruction.

EDSE 4360 Tch Children w/Challenging Beh
This course focuses on the role of the teacher in meeting the special needs of children with challenging behaviors. Special attention will be given to behavioral management techniques and inclusionary practices.
Prerequisites: Admitted to and in good standing in the College of Education or department approval.

EDSE 4399 Issues in Special Education
This course examines current topics in the field of special education. May be repeated once when topic changes. To be taken as a capstone course by Special Education majors.
Prerequisites: Admission to the College of Education.

EDSE 5190 Special Issues in Special Ed
This course will examine timely topics of concern to educators involved in making decisions regarding special education. May be repeated once when topic changes.
Prerequisites: Graduate standing and permission of instructor.

EDSE 5290 Special Issues in Special Ed
This course will examine timely topics of concern to educators involved in making decisions regarding special education. May be repeated once when topic changes.
Prerequisites: Graduate standing and permission of instructor.
EDSE 5305 Teach Diverse & Exceptional Learners
A survey of special education, as seen from the perspective of normal psychomotor, cognitive, social, and behavioral norms with the focus on a basic overview of the federally determined categories of disabling conditions. Also includes an overview of the national legislation; litigation and advocacy trends; the Texas Rules and Regulations for Special Education; as well as research in the field. Prerequisites: Admission to the College of Education.

EDSE 5307 Evidence-Based Practice for Students with Disabilities
This course provides students with an overview of special education eligibility categories and the need for Evidence-Based Practice when teaching students with identified disabilities. The course will emphasize skills needed to determine when a teaching strategy qualifies as an Evidence-Based practice, and will present teaching strategies that are currently validated.

EDSE 5309 Special Education Law & Ethics
This course provides an overview of disability legislation with an emphasis on the Individuals with Disabilities Education Improvement Act, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act. The Individual Education Plans and Family Service Plans will be examined in response to legislative procedural requirements, and ethical guidelines for substantive requirements will be addressed.

EDSE 5310 Survey of Mild Disabilities
Focus will be on legal issues relating to mild disabilities. Research topics in specified Supreme Court cases will be required. Important aspects of IDEA will be discussed. The educational focus will be on inclusion within the mainstream program, and cooperative service programs involving regular and special education teachers, consultative teaching, and content mastery programs. May be taken concurrently with EDSE 5305. Prerequisites: EDSE 5305.

EDSE 5311 Issues in Disabilities Throughout Lifespan
This course provides an introduction to the culture of disability across the lifespan. The impact of disabilities on an individual across the lifespan will be explored, and the unique culture that is created by having a disability will be addressed. Examines characteristics of children with major biological risk conditions and disabilities, birth-six, with focus on the impact of these conditions on development; addresses career development and employment of individuals with disabilities. Attention will be placed on determining job options, job development, self-determination and person-centered planning.

EDSE 5315 Survey of Moderate, Severe & Profound Disabilities
Focus will be on legal issues relating to moderate, severe and profound disabilities. Research topics in specified Supreme Court case will be required. Important aspects of IDEA will be discussed. The educational focus will be on resource room and self-contained programs as well as special schools, hospitals or other long-term program. May be taken concurrently with EDSE 5305. Prerequisites: EDSE 5305.

EDSE 5320 Measurement & Evaluation
This course emphasizes application of standardized, teacher-made, and special tests concepts. Each student will develop a broad knowledge base of tests used in the assessment of students demonstrating disabling conditions, and developing instructional modifications and adaptations based on assessments. Emphasis will also be placed on factors involved in multicultural, multi-ethnic assessment. May be taken concurrently with EDSE 5330 and EDSE 5340. Prerequisites: Graduate standing.

EDSE 5325 Classroom & Behavior Management
Each student will demonstrate mastery of major concepts and techniques of effective classroom and behavior management of exceptional students experiencing academic and/or behavioral difficulties. Prerequisites: Graduate standing.

EDSE 5330 Academic Achievement Assessment
Each student will experience performance-based training in the administration, scoring and interpretation of the basic, individually administered academic achievement assessment procedures currently in use in the public schools, such as the Wide Range Achievement Test, Woodcock-Johnson Achievement Tests, Key Math, Peabody Individual Achievement Test, and other selected achievement tests when appropriate. May be taken concurrently with EDSE 5320. Prerequisites: EDSE 5305, EDSE 5320, and admission in the Educational Diagnostician Program.

EDSE 5340 Psychometrics
This course includes performance-based training in major individual intelligence or ability tests, that is the Stanford-Binet, Wechsler scales, and other selected individual intelligence scales. Each student will master the administrative techniques for each test, administer each test to a specific number of students, score, and interpret the results. Bilingual students will also master the Spanish versions when appropriate. May be taken concurrently with EDSE 5320. Prerequisites: EDSE 5305, EDSE 5320, and admission in the Educational Diagnostician Program.

EDSE 5345 Pract Educational Diagnostics
This course requires the satisfactory completion of a field experience under the direction of a practicing educational diagnostician and supervision by a University professor. Participants will work in the field of diagnostics with the administration, scoring and interpreting test instruments and procedures. The practicum student will also be expected to complete a site-based project designed in cooperation with the diagnostician mentor and university supervisor. Prerequisites: Completion of at least thirty hours of the required coursework for the master's program and a passing score on the TExES 153 Educational Diagnostician exams (see eligibility requirements to take TExES exams).

EDSE 5350 Assessment for Diagnosis & Intervention
This course will provide the student with an overview of diagnostic assessment instruments to identify students with disabilities. The course will also address assessment instruments for designing individualized interventions as well as general trends and issues in the field.
EDSE 5360 Essential Behavior Principles
Introduces graduate students to the basic principles of behavior analysis. Everyday behavior is examined as a part of the natural world and behavior change is explained by principles derived from scientific research. Course content includes principles and procedures of reinforcement, extinction, differential reinforcement, punishment, discrimination and generalization training, shaping, fading, and programming. Classical conditioning, conditional reinforcement, schedules of reinforcement, behavioral definitions, reliability and validity, and direct observation are also addressed.

EDSE 5361 Analytic Tech App Beh Analysis
This is the second course of a graduate-level course sequence. These courses cover academic content required to take the Behavior Analysis Certification Board Examination. This course covers more advanced behavioral principal and provides an in-depth review of applied behavior analytic techniques. It covers BACB exam task areas including conducting behavioral assessments, designing effective behavior change programs, and applying behavioral procedures consonant with ethical standards. Students will learn to apply behavior analytic principles toward the improvement of socially significant behaviors in a wide range of settings as well as to evaluate the effects of behavioral procedures. Prerequisites: EDSE 5235 and EDSE 5360.

EDSE 5362 Research&App Beh Analysis
This course is the third in a sequence for graduate students leading to a Certificate in Behavior Analysis. It features the use of the scientific method in evaluating assessment and intervention techniques in behavior analysis. Topics include critical analysis of research reports as consumers, measurement techniques, single-subject experimental design, selection of dependent and independent variables, graphical presentation and evaluation of results, and ethics pertaining to human subjects. Principles and procedures involved in the experimental analysis of reinforcement schedules, stimulus control, and stimulus equivalence are included. The sequence fulfills minimum academic requirements of the Behavior Analysis Certification Board. Prerequisites: EDSE 5325, EDSE 5360 and EDSE 5361.

EDSE 5363 Ethical, Legal & Prof Iss
This course is designed to be an introduction to the basic ethical and legal issues involved in the delivery of behavioral interventions with human populations. The course focuses on federal and state legislation, litigation, policies and guidelines of ethical practice of professionals. The format involves reading articles and chapters in a variety of topic areas including the BACB Guidelines for Responsible conduct and answering study questions specific to the content of the areas where the ethical situations are very, very clear. Prerequisites: EDSE 5325, EDSE 5360, EDSE 5361 and EDSE 5362.

EDSE 5364 Coll&Cons in Ed Settings
This course is designed to develop the knowledge and skills needed to effectively collaborate and consult with families, school personnel and community members in educational settings. Other topics include team membership, co-teaching, supervision of paraprofessionals, partnerships with families and development of interagency agreements to address the needs of individuals with disabilities.

EDSE 5365 Spec Ed Grad Pract
This course requires the satisfactory completion of a field experience under the direction and supervision of a University professor and other appropriate personnel specific to the practicum focus. Participants will identify one of the following concentration areas: 1. Autism: under the direction of special education professor. 2. Emotional Disturbance: under the direction of special education professor. 3. Applied Behavior Analysis: under the direction of special education professor and certified applied behavior analyst. Students selecting option 3 may repeat the practicum course multiple times to acquire required practicum hours for BCBA certification.

EDSE 5370 Intro Evid Inter Autism
This course provides an introduction to the causes and diagnosis of autism, scientific validation, applied behavior analysis, and ethical treatment. Students also learn to write functional objectives, plan positive reinforcement, and design an applied measurement system in the context of developing individualized Family Service Plans and Individualized Education Plans. The issue of culturally appropriate interventions is addressed. Prerequisites: EDSE 5325.

EDSE 5371 Teach Positive Beh Sup Autism
The focus of this course is the design of educational environments that maximize learning. This course covers the application of specific behavioral teaching procedures, including prompting, reinforcement, shaping, chaining, error correction and generalization methods, and the development of instructional plans. Emphasis is placed on function-based interventions to teach communication, social, self-help and pre-academic skills. Application of such methods in inclusive classroom settings is also considered. Prerequisites: EDSE 5325 and EDSE 5370.

EDSE 5372 Intervention Prog Mod Autism
This course covers how educational environments can be designed to maximize learning. Different models of effective, evidence-based behavioral interventions and teaching are analyzed. The use of teaching activity schedules and staff training to build supportive educational settings is also covered. Prerequisites: EDSE 5325, EDSE 5370 and EDSE 5371.

EDSE 5373 Iss Ed Behav Treat Autism
This course provides advanced students with an overview of the legal, ethical and current issues in the education of students with Autism. Topics include fad cures, inclusion, preparing in-home trainers, litigation and the right to appropriate education. This course has been designed to provide advanced students and professionals with an overview of important current issues in the education and behavioral treatment of autism. A majority of the information presented and discussed falls under the umbrella of research based teaching intervention. Prerequisites: EDSE 5325, EDSE 5370, EDSE 5371 and EDSE 5372.
EDSE 5374 Consult&Colla Autism Spec
This course is designed to develop the knowledge and skills needed to effectively work with faculty, administrators, students, para-educators, families and community members in a consultative and collaborative setting. The course focuses on the applications of collaboration related to consultation, team membership, co-teaching, partnership with families and developing interagency agreements to address the need of individual with autism. In addition, this course focuses on current practices in collaboration used in program planning, and implementation for students receiving special education services.
Prerequisites: EDSE 5325, EDSE 5370, EDSE 5371, EDSE 5372, and EDSE 5373.

EDSE 5390 Special Issues in Special Ed
This course will examine timely topics of concern to educators involved in making decisions regarding special education. May be repeated once when topic changes.
Prerequisites: Graduate standing and permission of instructor.

EDSE 5398 Research Design
This course introduces single subject design, qualitative and quantitative research methods and statistical software applications in the field of Special Education. Students will complete a proposal for a thesis in this course.
Prerequisites: Approval of major advisor.

EDSE 5399 Thesis
This course will provide students with opportunities and support for the satisfactory completion and defense of the Thesis. Grades awarded are P for pass and IP for in progress. If a grade of IP is received, students must enroll continuously until successful completion and defense. Failure to do so will result in a grade change from IP to F after one semester.
Prerequisites: EDSE 5398 or EDGR 5320.
