

# PHYS 2125 - University Physics I Lab: University Physics I Lab(SSI- June 02 to July 03)

Summer 2025 Syllabus, Section 3L2, CRN 51975

---

## Instructor Information

Mr. Juan Rafael Muñoz, Jr., M.S., E.I.T.

Adjunct Faculty

Email: [juan.munoz@tamiu.edu](mailto:juan.munoz@tamiu.edu)

Office: LBVSC 395

Office Hours:

M-R 12:30 - 1:30 PM

You may message me to set up an appointment outside the official office hours listed above.

Also, I have an open door policy.

---

## Times and Location

MTWR 10:15am-12:15pm in Lamar Bruni Vergara Science Ct 208

---

## Course Description

Laboratory course to accompany PHYS 2325. Laboratory experiments reinforce theoretical principles from PHYS 2325 and place importance on scientific communication and collaboration, as well as measurement methods, data collection, uncertainty and error analysis, and preparation of laboratory reports. Must be taken concurrently with PHYS 2325.

Mathematics & Physics Department, College of Arts & Sciences

---

## Additional Course Information

### ATTENDANCE

**Attendance is mandatory.** I take attendance at the start of every lab. Anyone who is not present during the time I take attendance will be marked late and receive a 5% reduction in their lab report grade for that experiment. **Anyone who is more than 30 minutes late will receive a 0 for that lab experiment, just as for an unexcused absence.** This is a lab class, and it is important you are present to collect the data. This is the purpose of labs. By collecting data in a controlled experiment you are applying the physics concepts you learn in lecture to the real world. This is how we do science. If you must miss a lab, please inform me at least 1-3 days before, and we can make arrangements so that you are not awarded the late or absent penalties. I allow at least 1 makeup lab for an **excused** absence.

### PRE-LAB QUESTIONS

**Pre-lab questions are worth 10% of the class grade.** They are available on Blackboard Ultra and due at the start of the lab class for the corresponding experiment. The pre-lab questions test your understanding of the experiment and prepare you to have an idea of what to do. You can answer the pre-lab questions for an experiment by reading about the experiment in your lab manual. They are a mixture of conceptual questions and calculation problems. You get unlimited attempts to answer the pre-lab questions, and the highest score is your final score. I drop the lowest set of pre-lab questions. The remaining pre-lab questions are used to calculate 10% of your class grade.

## LECTURE

I begin each lab with a lecture that lasts approximately 15 minutes. You may find these lectures in PowerPoint form under the Lectures folder. In these lectures, I review the theoretical concepts of the experiment which you ought to keep in mind while collecting your data. I will also give specific safety rules pertaining to the experiment and/or general safety rules. Finally, I explain the experimental procedure so you know exactly what data to record and in which data table. This lecture, along with answering the pre-lab questions, should prepare you to perform the experiment. Following the lecture, I require students to ask a **minimum** of 3 questions before proceeding with the experiment. The purpose of the three question requirement is to show students that asking questions is not as scary as they once thought.

## LAB REPORTS

**Lab reports are worth 60% of the class grade.** Students will work in groups of 4-5 to collect data. You will then report your data in the lab reports. You will also give some background on the experiment. **Only the designated group leader must submit the group's lab report.** Lab reports are due at the end of the week they are completed. In total, there will be 8 sections required in your lab reports. The detailed template for your report is given in a Word document on Blackboard Ultra under the Lab Reports folder. You may use the template exactly as is. Just be sure to erase the instructions and put the specific experiment information each time. I briefly outline the sections below, along with how much each section is worth:

1. Experiment Number and Name (2%)
2. Purpose and Objective (10%)
3. Equipment (5%)
4. Safety (8%)
5. Theory (10%)
6. Procedure (10%)
7. Data Analysis (35%)
8. Conclusion (20%)

**I expect different groups to have slightly different data within the allowed range of the instruments' precision.** It would be very strange if I saw every group with the **exact** same numbers for **all** portions of the experiment. I drop the lowest lab report. The remaining lab reports are used to calculate 60% of your class grade.

### Late Policy for Lab Reports

I accept late lab reports up to 2 days past their due date. I deduct 10% off each day it is late. **I do not accept any lab report more than 2 days late.**

## FINAL PRESENTATION

**The final presentation is worth 10% of the class grade.** Each group of students must present on one of the lab experiments conducted during the semester. Essentially, they turn their lab report into a PowerPoint presentation and perform the experiment in front of the class. Each group will be graded on the following:

- Presentation (**40%**)
  - Experiment Number and Name
  - Purpose and Objective
  - Equipment
  - Safety
  - Theory
  - Procedure
  - Data Analysis
  - Conclusion
- Performance (**60%**)
  - Conduct all parts of the experiment at least once
  - Obtain consistent results that agree with each other
  - All students perform some part of the experiment

## FINAL EXAM

**The final exam is worth 20% of the class grade.** It will be on Blackboard Ultra, and we will take it in-person at the same time and location as the lab classes. You can expect similar questions to those found on the pre-lab questions. Essentially, I will combine a few questions from each set of pre-lab questions. Additionally, there will be 1-3 essay questions asking you to define a lab term or explain a lab procedure in your own words.

## PERSONAL AI STATEMENT

The use of AI tools such as Spell Check in Word, Grammarly, Mendeley Reference Manager, or MyBib to improve grammar, spelling, punctuation, and citation of lab reports and essay questions is allowed.

All other AI tools including, but not limited to, ChatGPT and Copilot which can essentially write a whole essay are prohibited for lab reports and essay questions.

You may freely use any and all AI tools to better understand the experiments. For example, some students will copy and paste a portion of their textbook into ChatGPT to summarize and understand it. **This is completely fine, as long as you do not use the results in your lab reports.** I still expect the aforementioned lab report sections to be in your own words.

## STUDENT RESPONSIBILITIES

1. Provide respect to others so others may respect you.
2. Ask questions if you do not understand something.
3. **Safety:** Safety will always be observed in the laboratory including, but not limited to, no food or drink in the lab, no loose hair or jewelry that could get caught on equipment, no horseplaying, and listen to what your instructor tells you to do.
4. **Be Prepared:** All students must be on time and ready to begin lecture on time.
5. **Plagiarism:** Copying work from other students will be considered academic dishonesty and will be dealt with accordingly.
6. **Date Change:** The instructor reserves the right to change any test pattern, test dates, homework, and class rules, with prior in-class announcement.
7. **Communication:** My preferred method of communication for course-related topics is through Blackboard Ultra. You may email me to communicate emergencies such as potential absences.
8. **Calculator:** A scientific calculator can be used in exams. Electronic equipment that is capable of using data stored prior to the test schedule is not allowed during the test. Electronic equipment that is capable of communicating between other equipment inside or outside the classroom is not allowed either. Talk with your instructor if you are unsure of how to obtain a calculator that is allowed.
9. **Cell Phone:** Students using cellular phone or beeper/pager in the classroom are advised to keep them at "off" or "vibrating" mode. In any circumstances, no communication is allowed in the classroom. Students are advised to take emergency calls outside of the classroom, taking care to leave as quietly as possible to not disturb others. They may return once they finish their call.
10. **Always** include the units with every measurement.
11. **Always** show all the steps involved in your calculations. If you do not show your work, then you cannot prove that you did the work. I will then assume that you copied the results from your team members.
12. **Always** take your measurements to the correct significant figures using the least count plus one more estimated measurement in between the lines.
13. **Always** include the formulas used in calculating your results and verify your calculations. If your calculation results do not seem to come from the experimental data you obtained, then I will assume that you did not do your own calculations and just copied the results from one of your team members.
14. **Always** round off your calculation results to the correct number of significant figures.

## Student Learning Outcomes

Upon successful completion of the course, the student will be able to:

- Explain why experiments are an important component of the scientific method.
- Explain why uncertainty is present in all measurements.
- Collect experimental data to compare with theoretical predictions.
- Plot data to show relationships between variables in graphical form.
- Interpret data from tables and graphs.

## Important Dates

Visit the Academic Calendar ([tamui.edu](https://www.tamui.edu/academiccalendar/)) (<https://www.tamui.edu/academiccalendar/>) page to view the term's important dates.

## Textbooks

Group	Title	Author	ISBN
Required	Physics Laboratory Experiments, 8th Edition	Jerry D. Wilson and Cecilia A. Hernández-Hall	978-1-285-73856-7

## Grading Criteria

GRADE	PERCENTAGE
A	90-100
B	80-89
C	70-79
D	60-69
F	Below 60

## Lab Schedule

Day	Date	Agenda/Topic	Reading(s)	Due
Mon	6/2	Introduction and Lab Safety		
Tue	6/3	Experiment 02: Experimental Uncertainty (Error) and Data Analysis		Pre-Lab Questions for Experiment 02
Wed	6/4	Experiment 03: Measurement Instruments (Mass, Volume, and Density)		Pre-Lab Questions for Experiment 03
Thu	6/5	Experiment 03: Measurement Instruments (Mass, Volume, and Density)		Lab Report for Experiment 02 Lab Report for Experiment 03
Mon	6/9	Experiment 04: Simple Pendulum Parameters		Pre-Lab Questions for Experiment 04
Tue	6/10	Experiment 04: Simple Pendulum Parameters		
Wed	6/11	Experiment 05: Uniformly Accelerated Motion: Measurement of g		Pre-Lab Questions for Experiment 05
Thu	6/12	Experiment 05: Uniformly Accelerated Motion: Measurement of g		Lab Report for Experiment 04 Lab Report for Experiment 05
Mon	6/16	Experiment 06: The Addition and Resolution of Force Vectors: The Force Table		Pre-Lab Questions for Experiment 06
Tue	6/17	Experiment 08: Conservation of Linear Momentum		Pre-Lab Questions for Experiment 08
Wed	6/18	Experiment 09: Ballistic Pendulum		Pre-Lab Questions for Experiment 09
Thu	6/19	Experiment 09: Ballistic Pendulum		Lab Report for Experiment 06 Lab Report for Experiment 08 Lab Report for Experiment 09
Mon	6/23	Experiment 10: Centripetal Force		Pre-Lab Questions for Experiment 10
Tue	6/24	Experiment 11: Friction		Pre-Lab Questions for Experiment 11
Wed	6/25	Experiment 11: Friction		
Thu	6/26	Experiment 12: Work and Energy		Pre-Lab Questions for Experiment 12 Lab Report for Experiment 10 Lab Report for Experiment 11 Lab Report for Experiment 12
Mon	6/30	Experiment 14 : Torques, Equilibrium, and Center of Gravity		Pre-Lab Questions for Experiment 14

Tue	7/1	Makeup Lab
Wed	7/2	Final Presentation
Thu	7/3	Final Exam

Lab Report for Experiment 14

## Core Curriculum Learning Outcomes

1. **Critical Thinking Skills (CT)** - creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
2. **Communication Skills (COM)** - effective development, interpretation and expression of ideas through written, oral and visual communication.
3. **Empirical and Quantitative Skills (EQS)** - manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
4. **Teamwork (TW)** - ability to consider different points of view and to work effectively with others to support a shared purpose or goal

## University/College Policies

Please see the University Policies below.

### COVID-19 Related Policies

If you have tested positive for COVID-19, please refer to the Student Handbook, Appendix A (Attendance Rule) for instructions.

### Required Class Attendance

Students are expected to attend every class in person (or virtually, if the class is online) and to complete all assignments. If you cannot attend class, it is your responsibility to communicate absences with your professors. The faculty member will decide if your excuse is valid and thus may provide lecture materials of the class. According to University policy, acceptable reasons for an absence, which cannot affect a student's grade, include:

- Participation in an authorized University activity.
- Death or major illness in a student's immediate family.
- Illness of a dependent family member.
- Participation in legal proceedings or administrative procedures that require a student's presence.
- Religious holy day.
- Illness that is too severe or contagious for the student to attend class.
- Required participation in military duties.
- Mandatory admission interviews for professional or graduate school which cannot be rescheduled.

Students are responsible for providing satisfactory evidence to faculty members within seven calendar days of their absence and return to class. They must substantiate the reason for the absence. If the absence is excused, faculty members must either provide students with the opportunity to make up the exam or other work missed, or provide a satisfactory alternative to complete the exam or other work missed within 30 calendar days from the date of absence. Students who miss class due to a University-sponsored activity are responsible for identifying their absences to their instructors with as much advance notice as possible.

### Classroom Behavior (applies to online or Face-to-Face Classes)

TAMU encourages classroom discussion and academic debate as an essential intellectual activity. It is essential that students learn to express and defend their beliefs, but it is also essential that they learn to listen and respond respectfully to others whose beliefs they may not share. The University will always tolerate different, unorthodox, and unpopular points of view, but it will not tolerate condescending or insulting remarks. When students verbally abuse or ridicule and intimidate others whose views they do not agree with, they subvert the free exchange of ideas that should characterize a university classroom. If their actions are deemed by the professor to be disruptive, they will be subject to appropriate disciplinary action (please refer to Student Handbook Article 4).

### TAMU Honor Code: Plagiarism and Cheating

As a TAMU student, you are bound by the TAMU Honor Code to conduct yourself ethically in all your activities as a TAMU student and to report violations of the Honor Code. Please read carefully the Student Handbook Article 7 and Article 10 available at <https://www.tamtu.edu/scce/studenthandbook.shtml> (<https://www.tamtu.edu/scce/studenthandbook.shtml>).

We are committed to strict enforcement of the Honor Code. Violations of the Honor Code tend to involve claiming work that is not one's own, most commonly plagiarism in written assignments and any form of cheating on exams and other types of assignments.

Plagiarism is the presentation of someone else's work as your own. It occurs when you:

1. Borrow someone else's facts, ideas, or opinions and put them entirely in your own words. You must acknowledge that these thoughts are not your own by immediately citing the source in your paper. Failure to do this is plagiarism.
2. Borrow someone else's words (short phrases, clauses, or sentences), you must enclose the copied words in quotation marks as well as citing the source. Failure to do this is plagiarism.
3. Present someone else's paper or exam (stolen, borrowed, or bought) as your own. You have committed a clearly intentional form of intellectual theft and have put your academic future in jeopardy. This is the worst form of plagiarism.

Here is another explanation from the 2020, seventh edition of the Manual of The American Psychological Association (APA):

"Plagiarism is the act of presenting the words, idea, or images of another as your own; it denies authors or creators of content the credit they are due. Whether deliberate or unintentional, plagiarism violates ethical standards in scholarship" (p. 254). This same principle applies to the illicit use of AI.

**Plagiarism:** Researchers do not claim the words and ideas of another as their own; they give credit where credit is due. Quotations marks should be used to indicate the exact words of another. Each time you paraphrase another author (i.e., summarize a passage or rearrange the order of a sentence and change some of the words), you need to credit the source in the text. The key element of this principle is that authors do not present the work of another as if it were their own words. This can extend to ideas as well as written words. If authors model a study after one done by someone else, the originating author should be given credit. If the rationale for a study was suggested in the discussion section of someone else's article, the person should be given credit. Given the free exchange of ideas, which is very important for the health of intellectual discourse, authors may not know where an idea for a study originated. If authors do know, however, they should acknowledge the source; this includes personal communications (p. 11). For guidance on proper documentation, consult the Academic Success Center or a recommended guide to documentation and research such as the Manual of the APA or the MLA Handbook for Writers of Research Papers. If you still have doubts concerning proper documentation, seek advice from your instructor prior to submitting a final draft.

TAMU has penalties for plagiarism and cheating.

- **Penalties for Plagiarism:** Should a faculty member discover that a student has committed plagiarism, the student should receive a grade of 'F' in that course and the matter will be referred to the Honor Council for possible disciplinary action. The faculty member, however, may elect to give freshmen and sophomore students a "zero" for the assignment and to allow them to revise the assignment up to a grade of "F" (50%) if they believe that the student plagiarized out of ignorance or carelessness and not out of an attempt to deceive in order to earn an unmerited grade; the instructor must still report the offense to the Honor Council. This option should not be available to juniors, seniors, or graduate students, who cannot reasonably claim ignorance of documentation rules as an excuse. For repeat offenders in undergraduate courses or for an offender in any graduate course, the penalty for plagiarism is likely to include suspension or expulsion from the university.
  - **Caution:** Be very careful what you upload to Turnitin or send to your professor for evaluation. Whatever you upload for evaluation will be considered your final, approved draft. If it is plagiarized, you will be held responsible. The excuse that "it was only a draft" will not be accepted.
  - **Caution:** Also, do not share your electronic files with others. If you do, you are responsible for the possible consequences. If another student takes your file of a paper and changes the name to his or her name and submits it and you also submit the paper, we will hold both of you responsible for plagiarism. It is impossible for us to know with certainty who wrote the paper and who stole it. And, of course, we cannot know if there was collusion between you and the other student in the matter.
- **Penalties for Cheating:** Should a faculty member discover a student cheating on an exam or quiz or other class project, the student should receive a "zero" for the assignment and not be allowed to make the assignment up. The incident should be reported to the chair of the department and to the Honor Council. If the cheating is extensive, however, or if the assignment constitutes a major grade for the course (e.g., a final exam), or if the student has cheated in the past, the student should receive an "F" in the course, and the matter should be referred to the Honor Council. Additional penalties, including suspension or expulsion from the university may be imposed. Under no circumstances should a student who deserves an "F" in the course be allowed to withdraw from the course with a "W."
  - **Caution:** Chat groups that start off as "study groups" can easily devolve into "cheating groups." Be very careful not to join or remain any chat group if it begins to discuss specific information about exams or assignments that are meant to require individual work. If you are a member of such a group and it begins to cheat, you will be held responsible along with all the other members of the group. The TAMU Honor Code requires that you report any such instances of cheating.
- **Student Right of Appeal:** Faculty will notify students immediately via the student's TAMU e-mail account that they have submitted plagiarized work. Students have the right to appeal a faculty member's charge of academic dishonesty by notifying the TAMU Honor Council of their intent to appeal as long as the notification of appeal comes within 10 business days of the faculty member's e-mail message to the student and/or the Office of Student Conduct and Community Engagement. The Student Handbook provides more details.

## Use of Work in Two or More Courses

You may not submit work completed in one course for a grade in a second course unless you receive explicit permission to do so by the instructor of the second course. In general, you should get credit for a work product only once.

## AI Policies

Your instructor will provide you with their personal policy on the use of AI in the classroom setting and associated coursework.

## TAMU E-Mail and SafeZone

Personal Announcements sent to students through TAMU E-mail (tamiu.edu or dusty email) are the official means of communicating course and university business with students and faculty –not the U.S. Mail and no other e-mail addresses. Students and faculty must check their TAMU e-mail accounts regularly, if not daily. Not having seen an important TAMU e-mail or message from a faculty member, chair, or dean is not accepted as an excuse for failure to take important action.

Students, faculty, and staff are encouraged to download the SafeZone app, which is a free mobile app for all University faculty, staff, and students. SafeZone allows you to: report safety concerns (24/7), get connected with mental health professionals, activate location sharing with authorities, and anonymously report incidents. Go to <https://www.tamiu.edu/adminis/police/safezone/index.shtml> for more information.

## Copyright Restrictions

The Copyright Act of 1976 grants to copyright owners the exclusive right to reproduce their works and distribute copies of their work. Works that receive copyright protection include published works such as a textbook. Copying a textbook without permission from the owner of the copyright may constitute copyright infringement. Civil and criminal penalties may be assessed for copyright infringement. Civil penalties include damages up to \$100,000; criminal penalties include a fine up to \$250,000 and imprisonment. Copyright laws do not allow students and professors to make photocopies of copyrighted materials, but you may copy a limited portion of a work, such as article from a journal or a chapter from a book for your own personal academic use or, in the case of a professor, for personal, limited classroom use. In general, the extent of your copying should not suggest that the purpose or the effect of your copying is to avoid paying for the materials. And, of course, you may not sell these copies for a profit. Thus, students who copy textbooks to avoid buying them or professors who provide photocopies of textbooks to enable students to save money are violating the law.

## Students with Disabilities

Texas A&M International University seeks to provide reasonable accommodations for all qualified persons with disabilities. This University will adhere to all applicable federal, state, and local laws, regulations and guidelines with respect to providing reasonable accommodations as required to afford equal education opportunity. It is the student's responsibility to register with the Office of Student Counseling and Disability Services located in Student Center 126. This office will contact the faculty member to recommend specific, reasonable accommodations. Faculty are prohibited from making accommodations based solely on communications from students. They may make accommodations only when provided documentation by the Student Counseling and Disability Services office.

## Student Attendance and Leave of Absence (LOA) Policy

As part of our efforts to assist and encourage all students towards graduation, TAMU provides LOA's for students, including pregnant/parenting students, in accordance with the Attendance Rule (Section 3.07) and the Student LOA Rule (Section 3.08), which includes the "Leave of Absence Request" form. Both rules can be found in the TAMU Student Handbook (URL: <http://www.tamiu.edu/studentaffairs/StudentHandbook1.shtml> (<http://www.tamiu.edu/studentaffairs/StudentHandbook1.shtml/>)).

## Pregnant and Parenting Students

Under Title IX of the Education Amendments of 1972, harassment based on sex, including harassment because of pregnancy or related conditions, is prohibited. A pregnant/parenting student must be granted an absence for as long as the student's physician deems the absence medically necessary. It is a violation of Title IX to ask for documentation relative to the pregnant/parenting student's status beyond what would be required for other medical conditions. If a student would like to file a complaint for discrimination due to his or her pregnant/parenting status, please contact the TAMU Title IX Coordinator (Lorissa M. Cortez, 5201 University Boulevard, KLM 159B, Laredo, TX 78041, [TitleIX@tamiu.edu](mailto:TitleIX@tamiu.edu), 956.326.2857) and/or the Office of Civil Rights (Dallas Office, U.S. Department of Education, 1999 Bryan Street, Suite 1620, Dallas, TX 75201-6810, 214.661.9600). You can also report it on TAMU's anonymous electronic reporting site: <https://www.tamiu.edu/reportit> (<https://www.tamiu.edu/reportit/>).

TAMU advises a pregnant/parenting student to notify their professor once the student is aware that accommodations for such will be necessary. It is recommended that the student and professor develop a reasonable plan for the student's completion of missed coursework or assignments. The Office of Equal Opportunity and Diversity (Lorissa M. Cortez, [lorissam.cortez@tamiu.edu](mailto:lorissam.cortez@tamiu.edu)) can assist the student and professor in working out the reasonable accommodations. For other questions or concerns regarding Title IX compliance related to pregnant/parenting students at the University, contact the Title IX Coordinator. In the event that a student will need a leave of absence for a substantial period of time, TAMU urges the student to consider a Leave of Absence (LOA) as outlined in the TAMU Student Handbook. As part of our efforts to assist and encourage all students towards graduation, TAMU provides LOA's for students, including pregnant/parenting students, in accordance with the Attendance Rule and the Student LOA Rule. Both rules can be found in the TAMU Student Handbook (<https://www.tamiu.edu/scce/studenthandbook.shtml> (<https://www.tamiu.edu/scce/studenthandbook.shtml/>)).

## Anti-Discrimination/Title IX

TAMU does not discriminate or permit harassment against any individual on the basis of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, educational programs, or employment. If you would like to file a complaint relative to Title IX or any civil rights violation, please contact the TAMU Director of Equal Opportunity and Diversity/Title IX Coordinator, Lorissa M. Cortez, 5201 University Boulevard, Killam Library 159B, Laredo, TX 78041, TitleIX@tamui.edu, 956.326.2857, via the anonymous electronic reporting website, ReportIt, at <https://www.tamui.edu/reportit> (<https://www.tamui.edu/reportit/>), and/or the Office of Civil Rights (Dallas Office), U.S. Department of Education, 1999 Bryan Street, Suite 1620, Dallas, TX 75201-6810, 214.661.9600.

## Incompletes

Students who are unable to complete a course should withdraw from the course before the final date for withdrawal and receive a "W." To qualify for an "incomplete" and thus have the opportunity to complete the course at a later date, a student must meet the following criteria:

1. The student must have completed 90% of the course work assigned before the final date for withdrawing from a course with a "W", and the student must be passing the course;
2. The student cannot complete the course because an accident, an illness, or a traumatic personal or family event occurred after the final date for withdrawal from a course;
3. The student must sign an "Incomplete Grade Contract" and secure signatures of approval from the professor and the college dean.
4. The student must agree to complete the missing course work before the end of the next long semester; failure to meet this deadline will cause the "I" to automatically be converted to an "F"; extensions to this deadline may be granted by the dean of the college. This is the general policy regarding the circumstances under which an "incomplete" may be granted, but under exceptional circumstances, a student may receive an incomplete who does not meet all of the criteria above if the faculty member, department chair, and dean recommend it.

## WIN Contracts

The Department of Biology and Chemistry does not permit WIN contracts. For other departments within the college, WIN Contracts are offered only under exceptional circumstances and are limited to graduating seniors. Only courses offered by full-time TAMU faculty or TAMU instructors are eligible to be contracted for the WIN requirement. However, a WIN contract for a course taught by an adjunct may be approved, with special permission from the department chair and dean. Students must seek approval before beginning any work for the WIN Contract. No student will contract more than one course per semester. Summer WIN Contracts must continue through both summer sessions.

## Student Responsibility for Dropping a Course

It is the responsibility of the student to drop the course before the final date for withdrawal from a course. Faculty members, in fact, may not drop a student from a course without getting the approval of their department chair and dean.

## Independent Study Course

Independent Study (IS) courses are offered only under exceptional circumstances. Required courses intended to build academic skills may not be taken as IS (e.g., clinical supervision and internships). No student will take more than one IS course per semester. Moreover, IS courses are limited to seniors and graduate students. Summer IS course must continue through both summer sessions.

## Grade Changes & Appeals

Faculty are authorized to change final grades only when they have committed a computational error or an error in recording a grade, and they must receive the approval of their department chairs and the dean to change the grade. As part of that approval, they must attach a detailed explanation of the reason for the mistake. Only in rare cases would another reason be entertained as legitimate for a grade change. A student who is unhappy with his or her grade on an assignment must discuss the situation with the faculty member teaching the course. If students believe that they have been graded unfairly, they have the right to appeal the grade using a grade appeal process in the Student Handbook and in the Faculty Handbook.

## Final Examination

All courses in all colleges must include a comprehensive exam or performance and be given on the date and time specified by the Academic Calendar and the Final Exam schedule published by the Registrar's Office. In the College of Arts & Sciences all final exams must contain a written component. The written component should comprise at least 20% of the final exam grade. Exceptions to this policy must receive the approval of the department chair and the dean at the beginning of the semester.

## Mental Health and Well-Being

The university aims to provide students with essential knowledge and tools to understand and support mental health. As part of our commitment to your well-being, we offer access to Telus Health, a service available 24/7/365 via chat, phone, or webinar. Scan the QR code to download the app and explore the resources available to you for guidance and support whenever you need it. The Telus app is available to download directly from TELUS (tamui.edu) (<https://www.tamui.edu/counseling/telus/>) or from the Apple App Store and Google Play.
