

BIOL 4472 - Current Topics in Biology: Neuroscience in Health and Disease (SSII - July 06 to Aug 06)

Summer 2026 Syllabus, Section 402, CRN 53124

Instructor Information

Giasuddin Ahmed, Ph.D.

Assistant Professor

Email: giasuddin.ahmed@tamiu.edu

Office: LBV 385D

Office Hours:

MTWR 4:00-5:00 PM or by appointment

Office Phone: 9563262586

Times and Location

MTWR 12:30pm-3:10pm in Academic Innovation Center 220

Course Description

A seminar course on topics of current biological interest. May be repeated when topic changes. No laboratory section included. Prerequisites: Junior standing or permission of instructor.

Biology&Chemistry Department, College of Arts & Sciences

Additional Course Information

Course Format

This is an intensive 5-week summer course that combines lectures, active learning exercises, clinical case studies, quizzes, group discussions, student presentations, and examinations. Students are expected to actively participate in class activities and complete assigned readings before each class session. Because of the accelerated summer schedule, regular attendance and consistent engagement are essential for success.

Please note that the instructor reserves the right to modify the contents of this syllabus during the course as deemed appropriate.

Attendance and Participation

Attendance is highly recommended at all class meetings as it carries some points. Course material will be presented through lectures, discussions, and case-study activities that may not be fully covered in the textbook. Lecture materials will be uploaded regularly. **Students are strongly encouraged to communicate with the instructor regarding their understanding of course content and to seek clarification when needed. Students are responsible for all announcements, assignments, and material presented during class.**

Students must be present in class to participate in quizzes, case studies, and exams. Student attendance will be verified through multiple methods. If it is determined that a student was not present in class during a quiz, case study, or exam, no points will be awarded for that activity.

Participation includes:

- Contributing to class discussions
- Participating in case-study analyses

- Engaging in group activities
- Completing in-class exercises and quizzes

Quizzes

Short quizzes will be administered throughout the course to assess understanding of recently covered material. Quizzes may include multiple-choice, short-answer, diagram interpretation, and clinical application questions.

Case Studies

Clinical and research-based case studies will be incorporated throughout the course to connect neuroscience concepts with real-world neurological disorders and patient outcomes. Students will analyze symptoms, interpret experimental findings, and apply neuroscience principles to explain disease mechanisms.

Group Presentation

Students are required to work actively and collaboratively to prepare and deliver a presentation on a neuroscience-related topic approved by the instructor. All members of a group should be familiar with the entire presentation and be able to answer questions related to any section of the research article.

For example, if a research article contains several figures in the Results section and each student is assigned to present a portion of the total number of figures, each student should not only understand and explain their assigned figures but also be knowledgeable about the figures presented by other group members. Students are expected to demonstrate an understanding of the study as a whole. Points may be deducted if a student is unable to answer questions related to sections of the article outside their assigned presentation portion.

Undergraduate Students

- Approximately four students per group
- 30 minutes presentation followed by 10 minutes discussion/Q&A

Graduate Students

- One group consisting of two students
- 40-minute presentation followed by 10 minutes discussion/Q&A
- Inclusion of primary research literature is required

Presentation evaluation will consider:

- Background of the topic
- Scientific accuracy
- Understanding of the topic
- Critical analysis
- Organization and clarity
- Quality of visual materials
- Ability to answer questions

Examinations

Three midterm examinations and one cumulative final examination will be administered during the course.

Examinations may include:

- Multiple-choice questions
- Short-answer questions
- Diagram interpretation
- Data analysis
- Clinical scenario-based questions

The final examination will be comprehensive and emphasize integration of concepts across all course topics.

Graduate Student Requirements

Graduate students enrolled in the 5000-level section will be expected to demonstrate a higher level of scholarly engagement than undergraduate students. Additional requirements may include:

- Expanded presentation requirements
- Critical evaluation of experimental design and methodology
- Participation in advanced discussions of disease mechanisms and current research findings

Technology and Classroom Etiquette

To promote an effective learning environment:

- **Mobile phones must be silenced during class unless there is an emergency.**
- **Gossiping during class is strictly prohibited.**
- Laptops and tablets may be used for course-related activities.
- Recording of lectures requires instructor permission.
- Respectful and professional conduct is expected during all class interactions and discussions.

Communication

Course announcements, grades, assignments, and supplemental materials will be distributed through the Blackboard. Students are responsible for checking course communications regularly and maintaining awareness of course updates.

Study Recommendations

Success in neuroscience requires consistent review and integration of concepts. Students are strongly encouraged to:

- **Review lecture notes after each class—must.**
- Complete assigned readings before class.
- Practice interpreting figures and diagrams.
- Participate actively in case-study discussions.
- Form study groups to reinforce learning.
- **Seek assistance during class, office hours when needed –must.**

Artificial Intelligence (AI) Use Statement

Artificial intelligence (AI) tools, such as generative AI systems, can be valuable resources for learning when used responsibly and ethically. In this course, students may use AI tools to support studying, brainstorming, reviewing concepts, improving writing clarity, generating practice questions, and exploring neuroscience topics. However, AI-generated content should be viewed as a learning aid rather than a substitute for independent thinking, scientific analysis, or original work.

Students are responsible for:

- Verifying the accuracy of any information obtained from AI tools.
- Critically evaluating AI-generated responses using course materials and reliable scientific sources.
- Ensuring that submitted assignments reflect their own understanding and intellectual effort.
- Properly acknowledging the use of AI tools when required by the instructor.

Students should not use AI tools to:

- Complete examinations, quizzes, or other assessments.
- Generate or submit work that is presented as entirely their own when substantial portions were created by AI.
- Circumvent learning objectives or academic integrity expectations.

The goal of this course is not only to learn neuroscience content but also to develop the scientific reasoning, critical thinking, and problem-solving skills that are essential for success in biology, neuroscience, health professions, and research careers. AI should be used as a tool to support these goals, not replace them.

Program Learning Outcomes

This course contributes to the Biology/Neuroscience program by enabling students to:

1. Apply biological principles to explain the structure and function of living systems.
2. Integrate molecular, cellular, physiological, and behavioral mechanisms to understand complex biological processes.
3. Analyze scientific information and evaluate evidence-based explanations of biological phenomena.
4. Employ critical thinking and problem-solving skills to interpret biological and health-related data.
5. Communicate scientific concepts effectively through written, oral, and visual presentations.
6. Apply scientific knowledge to understand human health, disease, and societal challenges.
7. Evaluate current scientific literature and emerging discoveries in neuroscience and biomedical research.
8. Demonstrate professionalism, collaboration, and ethical conduct in scientific inquiry.

Student Learning Outcomes

Student Learning Outcomes (SLOs)

Upon successful completion of this course, students will be able to:

1. Describe the organization and major functions of the central and peripheral nervous systems.
2. Explain neuronal structure, membrane potentials, action potentials, and synaptic transmission.
3. Compare the roles of major neurotransmitters and neurochemical signaling pathways in neural function.
4. Explain how sensory systems—including vision, hearing, balance, taste, smell, touch, and pain—detect and process information.
5. Interpret experimental data and clinical findings related to nervous system function and dysfunction.
6. Analyze neurological case studies and identify underlying neural mechanisms.
7. Compare the causes, symptoms, pathological changes, and treatments associated with Alzheimer's disease, Parkinson's disease, and stroke.
8. Apply neuroscience concepts to explain human behavior, cognition, sensation, and movement.
9. Communicate neuroscience concepts effectively through discussions, written assignments, and group presentations.
10. Evaluate and synthesize information from primary scientific literature and other scholarly sources.

Important Dates

Visit the Academic Calendar (tamiu.edu) (<https://www.tamiu.edu/academiccalendar/>) page to view the term's important dates.

Textbooks

Group	Title	Author	ISBN
	Principles of Neural Science	Eric Kandel	780071390118
	Introduction to Behavioral Neuroscience	Elizabeth D. Kirby, Melissa J. Glenn, Noah J. Sandstrom, Christina L. Williams	78-1-961584-57-0

Other Course Materials

To go to the bookstore, [click here \(https://www.bkstr.com/texasaminternationalstore/home\)](https://www.bkstr.com/texasaminternationalstore/home).

*[Any additional course materials can be added here. If there aren't any additional materials, you may REMOVE this section by clicking on the eyeball. **Please don't forget to remove these instructions.**]*

Grading Criteria

P.S. Students should check their grade regularly and discuss their concerns with the instructors. It is imperative that students should be serious from the beginning to do well in the course. Your grade concern towards the end of the semester will not be accepted.

GRADE	PERCENTAGE
A	90-100
B	80-89.9

C	70-79.9
D	60-69.9
F	Below 60

Open Boilerplate

****Tentative boiler plate which is subject to change if necessary**

ASSIGNMENT	VALUE
Attendance	5%
Quiz and case studies	20%
Exam 1	15%
Exam 2	15%
Exam 3	15%
Final Exam	20%
Group Presentation	10%

Schedule of Topics and Assignments

Day	Date	Agenda/Topic	Reading(s)	Due
Mon	7/6	Lecture 1_Structure of Nervous system part 1	Chapter 1_Introduction of Behavioral Neuroscience	
Tue	7/7	Lecture 2_Structure of Nervous system part 2 Quiz 1/case studies on lecture 1	Chapter 1_Introduction of Behavioral Neuroscience	
Wed	7/8	Lecture 3_Neuronal Physiology part 1 Quiz 2/case studies on lecture 2	Chapter 2_Introduction of Behavioral Neuroscience	
Thu	7/9	Lecture 4_Neuronal Physiology part 2 Quiz 3/case studies on lecture 3	Chapter 2_Introduction of Behavioral Neuroscience	
Mon	7/13	Exam 1 on lectures 1-4 Lecture 5_Neurochemistry part 1	Chapter 3_Introduction of Behavioral Neuroscience

Wed	7/15	Lecture 7_Vision part 1 Quiz 5/case studies on lecture 6	Chapter 6_Introduction of Behavioral Neuroscience	
Thu	7/16	Lecture 8_Vision part 2 Quiz 6/case studies on lecture 7	Chapter 6_Introduction of Behavioral Neuroscience	
Mon	7/20	Exam 2 on lectures 5-8 Lecture 9_Hearing and Balance part 1	Chapter 7_Introduction of Behavioral Neuroscience	
Tue	7/21	Lecture 10_Hearing and Balance part 2 Quiz 7/case studies on lecture 9	Chapter 7_Introduction of Behavioral Neuroscience	
Wed	7/22	Lecture 11_Chemical Senses part 1 Quiz 8/case studies on lecture 10	Chapter 8_Introduction of Behavioral Neuroscience	
Thu	7/23	Lecture 12_Chemical Senses part 2 Quiz 9/case studies on lecture 11	Chapter 8_Introduction of Behavioral Neuroscience	
Mon	7/27	Exam 3 on lectures 9-12 Lecture 13_Touch and pain part 1 Course evaluation	Chapter 9_Introduction of Behavioral Neuroscience	
Tue	7/28	Lecture 14_Touch and pain part 2 Quiz 9/case studies on lecture 13	Chapter 9_Introduction of Behavioral Neuroscience	
Wed	7/29	Neurological diseases	Research articles	
Thu	7/30	Group Presentations 1-4	Research Articles	
Mon	8/3	Group Presentations 5-9	Research Articles	

Tue	8/4	Comprehensive review 1
Wed	8/5	Comprehensive review 2
Thu	8/6	Final exam

University/College Policies

Please see the University Policies below.

COVID-19 Related Policies

If you have tested positive for COVID-19, please refer to the Student Handbook, Appendix A (Attendance Rule) for instructions.

Required Class Attendance

Students are expected to attend every class in person (or virtually, if the class is online) and to complete all assignments. If you cannot attend class, it is your responsibility to communicate absences with your professors. The faculty member will decide if your excuse is valid and thus may provide lecture materials of the class. According to University policy, acceptable reasons for an absence, which cannot affect a student's grade, include:

- Participation in an authorized University activity.
- Death or major illness in a student's immediate family.
- Illness of a dependent family member.
- Participation in legal proceedings or administrative procedures that require a student's presence.
- Religious holy day.
- Illness that is too severe or contagious for the student to attend class.
- Required participation in military duties.
- Mandatory admission interviews for professional or graduate school which cannot be rescheduled.

Students are responsible for providing satisfactory evidence to faculty members within seven calendar days of their absence and return to class. They must substantiate the reason for the absence. If the absence is excused, faculty members must either provide students with the opportunity to make up the exam or other work missed, or provide a satisfactory alternative to complete the exam or other work missed within 30 calendar days from the date of absence. Students who miss class due to a University-sponsored activity are responsible for identifying their absences to their instructors with as much advance notice as possible.

Classroom Behavior (applies to online or Face-to-Face Classes)

In the classroom, students are expected to listen attentively, participate respectfully, and adhere to established rules. Behavior that interferes with the class lecture may result in disciplinary action, ensuring a productive and respectful learning environment for everyone. Any disputes over academic matters should be addressed calmly and constructively, ideally during designated times such as office hours or after class. If a student does not agree with a decision, they can request a meeting with the instructor to discuss their concerns in more detail. Should further resolution be needed, the student may escalate the matter to the department head or use formal grievance procedures as outlined in the sections below. (please refer to Student Handbook Article 4 (<https://www.tamtu.edu/handbook/article-04.shtml>)).

TAMU Honor Code: Plagiarism and Cheating

As a TAMU student, you are bound by the TAMU Honor Code to conduct yourself ethically in all your activities as a TAMU student and to report violations of the Honor Code. Please read carefully the Student Handbook Article 7 and Article 10 available at Student Handbook (<https://www.tamtu.edu/handbook/index.shtml>).

We are committed to strict enforcement of the Honor Code. Violations of the Honor Code tend to involve claiming work that is not one's own, most commonly plagiarism in written assignments and any form of cheating on exams and other types of assignments.

Plagiarism is the presentation of someone else's work as your own. It occurs when you:

1. Borrow someone else's facts, ideas, or opinions and put them entirely in your own words. You must acknowledge that these thoughts are not your own by immediately citing the source in your paper. Failure to do this is plagiarism.
2. Borrow someone else's words (short phrases, clauses, or sentences), you must enclose the copied words in quotation marks as well as citing the source. Failure to do this is plagiarism.
3. Present someone else's paper or exam (stolen, borrowed, or bought) as your own. You have committed a clearly intentional form of intellectual theft and have put your academic future in jeopardy. This is the worst form of plagiarism.

Here is another explanation from the 2020, seventh edition of the Manual of The American Psychological Association (APA):

"Plagiarism is the act of presenting the words, idea, or images of another as your own; it denies authors or creators of content the credit they are due. Whether deliberate or unintentional, plagiarism violates ethical standards in scholarship" (p. 254). This same principle applies to the illicit use of AI.

Plagiarism: Researchers do not claim the words and ideas of another as their own; they give credit where credit is due. Quotations marks should be used to indicate the exact words of another. Each time you paraphrase another author (i.e., summarize a passage or rearrange the order of a sentence and change some of the words), you need to credit the source in the text. The key element of this principle is that authors do not present the work of another as if it were their own words. This can extend to ideas as well as written words. If authors model a study after one done by someone else, the originating author should be given credit. If the rationale for a study was suggested in the discussion section of someone else's article, the person should be given credit. Given the free exchange of ideas, which is very important for the health of intellectual discourse, authors may not know where an idea for a study originated. If authors do know, however, they should acknowledge the source; this includes personal communications (p. 11). For guidance on proper documentation, consult the Academic Success Center or a recommended guide to documentation and research such as the Manual of the APA or the MLA Handbook for Writers of Research Papers. If you still have doubts concerning proper documentation, seek advice from your instructor prior to submitting a final draft.

TAMIU has penalties for plagiarism and cheating.

- **Penalties for Plagiarism:** Should a faculty member discover that a student has committed plagiarism, the student should receive a grade of 'F' in that course and the matter will be referred to the Honor Council for possible disciplinary action. The faculty member, however, may elect to give freshmen and sophomore students a "zero" for the assignment and to allow them to revise the assignment up to a grade of "F" (50%) if they believe that the student plagiarized out of ignorance or carelessness and not out of an attempt to deceive in order to earn an unmerited grade; the instructor must still report the offense to the Honor Council. This option should not be available to juniors, seniors, or graduate students, who cannot reasonably claim ignorance of documentation rules as an excuse. For repeat offenders in undergraduate courses or for an offender in any graduate course, the penalty for plagiarism is likely to include suspension or expulsion from the university.
 - **Caution:** Be very careful what you upload to Turnitin or send to your professor for evaluation. Whatever you upload for evaluation will be considered your final, approved draft. If it is plagiarized, you will be held responsible. The excuse that "it was only a draft" will not be accepted.
 - **Caution:** Also, do not share your electronic files with others. If you do, you are responsible for the possible consequences. If another student takes your file of a paper and changes the name to his or her name and submits it and you also submit the paper, we will hold both of you responsible for plagiarism. It is impossible for us to know with certainty who wrote the paper and who stole it. And, of course, we cannot know if there was collusion between you and the other student in the matter.
- **Penalties for Cheating:** Should a faculty member discover a student cheating on an exam or quiz or other class project, the student should receive a "zero" for the assignment and not be allowed to make the assignment up. The incident should be reported to the chair of the department and to the Honor Council. If the cheating is extensive, however, or if the assignment constitutes a major grade for the course (e.g., a final exam), or if the student has cheated in the past, the student should receive an "F" in the course, and the matter should be referred to the Honor Council. Additional penalties, including suspension or expulsion from the university may be imposed. Under no circumstances should a student who deserves an "F" in the course be allowed to withdraw from the course with a "W."
 - **Caution:** Chat groups that start off as "study groups" can easily devolve into "cheating groups." Be very careful not to join or remain any chat group if it begins to discuss specific information about exams or assignments that are meant to require individual work. If you are a member of such a group and it begins to cheat, you will be held responsible along with all the other members of the group. The TAMIU Honor Code requires that you report any such instances of cheating.
- **Student Right of Appeal:** Faculty will notify students immediately via the student's TAMIU e-mail account that they have submitted plagiarized work. Students have the right to appeal a faculty member's charge of academic dishonesty by notifying the TAMIU Honor Council of their intent to appeal as long as the notification of appeal comes within 10 business days of the faculty member's e-mail message to the student and/or the Office of Student Conduct and Community Engagement. The Student Handbook provides more details.

Use of Work in Two or More Courses

You may not submit work completed in one course for a grade in a second course unless you receive explicit permission to do so by the instructor of the second course. In general, you should get credit for a work product only once.

AI Policies

Your instructor will provide you with their personal policy on the use of AI in the classroom setting and associated coursework.

TAMIU E-Mail and SafeZone

Personal Announcements sent to students through TAMIU E-mail (tamiu.edu or dusty email) are the official means of communicating course and university business with students and faculty –not the U.S. Mail and no other e-mail addresses. Students and faculty must check their TAMIU e-mail accounts regularly, if not daily. Not having seen an important TAMIU e-mail or message from a faculty member, chair, or dean is not accepted as an excuse for failure to take important action.

Students, faculty, and staff are encouraged to download the SafeZone app, which is a free mobile app for all University faculty, staff, and students. SafeZone allows you to: report safety concerns (24/7), get connected with mental health professionals, activate location sharing with authorities, and anonymously report incidents. Go to SafeZone (<https://www.tamui.edu/adminis/police/safezone/index.shtml>) for more information.

Copyright Restrictions

The Copyright Act of 1976 grants to copyright owners the exclusive right to reproduce their works and distribute copies of their work. Works that receive copyright protection include published works such as a textbook. Copying a textbook without permission from the owner of the copyright may constitute copyright infringement. Civil and criminal penalties may be assessed for copyright infringement. Civil penalties include damages up to \$100,000; criminal penalties include a fine up to \$250,000 and imprisonment. Copyright laws do not allow students and professors to make photocopies of copyrighted materials, but you may copy a limited portion of a work, such as article from a journal or a chapter from a book for your own personal academic use or, in the case of a professor, for personal, limited classroom use. In general, the extent of your copying should not suggest that the purpose or the effect of your copying is to avoid paying for the materials. And, of course, you may not sell these copies for a profit. Thus, students who copy textbooks to avoid buying them or professors who provide photocopies of textbooks to enable students to save money are violating the law.

Students with Disabilities

Texas A&M International University seeks to provide reasonable accommodations for all qualified persons with disabilities. This University will adhere to all applicable federal, state, and local laws, regulations and guidelines with respect to providing reasonable accommodations as required to afford equal education opportunity. It is the student's responsibility to register with the Office of Disability Services for Students located in Student Center 124. This office will contact the faculty member to recommend specific, reasonable accommodations. Faculty are prohibited from making accommodations based solely on communications from students. They may make accommodations only when provided documentation by the Office of Disability Services for Students.

For accommodations or assistance with disabilities, contact the Disability Coordinator, Karla Pedraza, at karla.pedraza@tamui.edu, call 956.326.2763, or visit Student Center 124.

Student Attendance and Leave of Absence (LOA) Policy

As part of our efforts to assist and encourage all students towards graduation, TAMIU provides LOA's for students, including pregnant/parenting students, in accordance with the Attendance Rule (Section 3.07) and the Student LOA Rule (Section 3.08), which includes the "Leave of Absence Request" form. Both rules can be found in the TAMIU Student Handbook (URL: [Student Handbook \(https://www.tamui.edu/handbook/index.shtml\)](https://www.tamui.edu/handbook/index.shtml)).

Pregnant and Parenting Students

Under Title IX of the Education Amendments of 1972, harassment based on sex, including harassment because of pregnancy or related conditions, is prohibited. A pregnant/parenting student must be granted an absence for as long as the student's physician deems the absence medically necessary. It is a violation of Title IX to ask for documentation relative to the pregnant/parenting student's status beyond what would be required for other medical conditions. Students who experience or observe alleged or suspected discrimination due to their pregnant/parenting status, should report to the TAMIU Title IX Coordinator (Lorissa M. Cortez, 5201 University Boulevard, KLM 159B, Laredo, TX 78041, TitleIX@tamui.edu, 956.326.2857) and/or the Office of Civil Rights (Dallas Office, U.S. Department of Education, 1999 Bryan Street, Suite 1620, Dallas, TX 75201-6810, 214.661.9600). You can also report it on TAMIU's anonymous electronic reporting site, *Report It*, at <https://www.tamui.edu/reportit> (<https://www.tamui.edu/reportit/index.shtml>).

TAMIU advises a pregnant/parenting student to notify their professor once the student is aware that accommodations for such will be necessary. It is recommended that the student and professor develop a reasonable plan for the student's completion of missed coursework or assignments. The Office of Compliance (Lorissa M. Cortez, lorissam.cortez@tamui.edu) can assist the student and professor in working out the reasonable accommodation. For other questions or concerns regarding Title IX compliance related to pregnant/parenting students, contact the Title IX Coordinator. In the event that a student needs a leave of absence for a substantial period of time, TAMIU urges the student to consider a Leave of Absence (LOA) as outlined in the TAMIU *Student Handbook*.#As part of our efforts to assist and encourage all students towards graduation, TAMIU provides LOAs for students, including pregnant/parenting students, in accordance with the Attendance Rule and the Student LOA Rule.#Both rules can be found in the TAMIU *Student Handbook*.

For parenting-related rights, accommodations, and resources, contact the Parenting Liaison, Mayra Hernandez, at mghernandez@tamui.edu, call 956.326.2265, or visit Student Center 226.

For pregnancy-related rights, accommodations, and resources, contact the TIX Coordinator, Lorissa Cortez, at lorissaM.cortez@tamui.edu, call 956.326.2857, or visit Killam Library 159.

Anti-Discrimination/Title IX

TAMIU does not discriminate or permit harassment against any individual on the basis of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, educational programs, or employment. If you would like to file a complaint relative to Title IX or any civil rights

violation, please contact the TAMIU Director of Equal Opportunity and Diversity/Title IX Coordinator, Lorissa M. Cortez, 5201 University Boulevard, Killam Library 159B, Laredo, TX 78041, TitleIX@tamiu.edu, 956.326.2857, via the anonymous electronic reporting website, ReportIt (<https://www.tamiu.edu/reportit>) and/or the Office of Civil Rights (Dallas Office), U.S. Department of Education, 1999 Bryan Street, Suite 1620, Dallas, TX 75201-6810, 214.661.9600.

Incompletes

Students who are unable to complete a course should withdraw from the course before the final date for withdrawal and receive a “W.” To qualify for an “incomplete” and thus have the opportunity to complete the course at a later date, a student must meet the following criteria:

1. The student must have completed 90% of the course work assigned before the final date for withdrawing from a course with a “W”, and the student must be passing the course;
2. The student cannot complete the course because an accident, an illness, or a traumatic personal or family event occurred after the final date for withdrawal from a course;
3. The student must sign an “Incomplete Grade Contract” and secure signatures of approval from the professor and the college dean.
4. The student must agree to complete the missing course work before the end of the next long semester; failure to meet this deadline will cause the “I” to automatically be converted to an “F”; extensions to this deadline may be granted by the dean of the college. This is the general policy regarding the circumstances under which an “incomplete” may be granted, but under exceptional circumstances, a student may receive an incomplete who does not meet all of the criteria above if the faculty member, department chair, and dean recommend it.

WIN Contracts

The Department of Biology and Chemistry does not permit WIN contracts. For other departments within the college, WIN Contracts are offered only under exceptional circumstances and are limited to graduating seniors. Only courses offered by full-time TAMIU faculty or TAMIU instructors are eligible to be contracted for the WIN requirement. However, a WIN contract for a course taught by an adjunct may be approved, with special permission from the department chair and dean. Students must seek approval before beginning any work for the WIN Contract. No student will contract more than one course per semester. Summer WIN Contracts must continue through both summer sessions.

Student Responsibility for Dropping a Course

It is the responsibility of the student to drop the course before the final date for withdrawal from a course. Faculty members, in fact, may not drop a student from a course without getting the approval of their department chair and dean.

Independent Study Course

Independent Study (IS) courses are offered only under exceptional circumstances. Required courses intended to build academic skills may not be taken as IS (e.g., clinical supervision and internships). No student will take more than one IS course per semester. Moreover, IS courses are limited to seniors and graduate students. Summer IS course must continue through both summer sessions.

Grade Changes & Appeals

Faculty are authorized to change final grades only when they have committed a computational error or an error in recording a grade, and they must receive the approval of their department chairs and the dean to change the grade. As part of that approval, they must attach a detailed explanation of the reason for the mistake. Only in rare cases would another reason be entertained as legitimate for a grade change. A student who is unhappy with his or her grade on an assignment must discuss the situation with the faculty member teaching the course. If students believe that they have been graded unfairly, they have the right to appeal the grade using a grade appeal process in the Student Handbook and in the Faculty Handbook.

Final Examination

All courses in all colleges must include a comprehensive exam or performance and be given on the date and time specified by the Academic Calendar and the Final Exam schedule published by the Registrar’s Office. In the College of Arts & Sciences all final exams must contain a written component. The written component should comprise at least 20% of the final exam grade. Exceptions to this policy must receive the approval of the department chair and the dean at the beginning of the semester.

Mental Health and Well-Being

The university aims to provide students with essential knowledge and tools to understand and support mental health. As part of our commitment to your well-being, we offer access to Telus Health, a service available 24/7/365 via chat, phone, or webinar. Scan the QR code to download the app and explore the resources available to you for guidance and support whenever you need it. The Telus app is available to download directly from TELUS (tamiu.edu) (<https://www.tamiu.edu/counseling/telus/>) or from the Apple App Store and Google Play.
